Luiz Quelves Da Silva

Gerente de TI en Megamedia | Arquitecturas de TI, Arquitectura
nativa en la nube

Santiago, Santiago Metropolitan Region, Chile

Summary

With over a decade of leading IT teams, I specialize in providing innovative solutions and optimizing cloud-native architectures to meet business needs. In my experience at Megamedia, I've led projects driving digital transformation, enhancing efficiency, and reducing operational costs through cloud infrastructure implementation and agile project management.

My focus is on fostering a collaborative, results-oriented work environment where flexibility and adaptability to change are paramount. My commitment to excellence and innovation in the IT sector is reflected in developing and maintaining scalable digital platforms and cultivating high-performing teams.

Key skills include:

- IT management
- Development and maintenance of enterprise applications and web platforms
- Mobile development (Android, iOS)
- Development of applications and REST APIs with Node.js
- Distributed architecture
- Automation of development, testing, and production processes with CI/CD
- Infrastructure management and user support
- Agile project management using XP and SCRUM
- Architecture and processes using ArchiMate, BPMN, and UML
- Training of development, maintenance, and operation teams
- Service management
- Teaching experience in software development processes

Additionally, I have experience using a variety of technologies, including open-source solutions, Java / JEE, PHP, nodejs, Python, Oracle, Microsoft, SOA / BPM solutions, mobile platforms (Android, iOS), Machine Learning, and cloud platforms like AWS, Azure,

GCP, and Huawei. I am familiar with containers like Docker and Kubernetes, as well as automation of development processes with CI/CD.

Experience

Megamedia

Gerente de TI

May 2018 - Present (8 years 1 month)

Ñuñoa, Región Metropolitana de Santiago, Chile

Imagemaker S.A.

Software Development Manager

April 2017 - May 2018 (1 year 2 months)

Provincia de Santiago, Chile

gurú

IT Application Development Manager

August 2007 - April 2017 (9 years 9 months)

Santiago, Chile

Improvement:

Leading teams in the development of portals and mobile applications for products such as <http://miportal.gurusoluciones.com.ar>, <http://www.amarillas.cl>, <http://ecommerce.amarillas.cl>, <http://Plans.amarillas.cl>, and <http://www.blancas.cl>. This involved managing a cluster of search engines, classification and indexing systems, along with back-office maintenance incorporating business logic.

Utilizing agile methodologies like SCRUM and XP to effectively coordinate with the project team.

Projects primarily leverage Service Orientation concepts and apply patterns, predominantly on the Java platform, employing frameworks like spring-framework, etc.

The operating platform operates on Linux, utilizing application servers such as JBoss, Tomcat, Apache, and AWS Services like EC2, S3. These projects contribute approximately 30% of the company's revenues.

Notable Projects:

1. Customer Portal Latam (2016 - 2017)

- Implementation of a client portal featuring information consultation, invoice payment, ticket opening, and consultation. The project, built using microservices in the Java platform, utilized databases such as Informix, Oracle, MariaDB, MongoDB, with an open architecture and AWS services like S3, EC2.

2. Latam Platforms Consolidation (2015 - 2016)

- Consolidation of web and mobile platforms for Yellow Pages and White Pages across LATAM countries, reducing three platforms per country to one. The project, spanning approximately 12 months, utilized an Open Source Platform with Linux, Java, MySQL, and Solr for the search engine.

3. Statistical Finder with Solr for New Media Platform in Yell Chile (2014 - 2015)

- Development of a Solr Search Engine plugin for statistical finder, enhancing advertisement visualization possibilities with minimal investment.
